

# Trip report Madeira 2<sup>nd</sup> to 9<sup>th</sup> August 2005

## General

We, Stefan Cherrug and Per Anders Bertilsson, made a birding trip to Madeira 2<sup>nd</sup> to 9<sup>th</sup> August 2005 staying at Florasol hotel, Funchal. We travelled with Solresor from Malmö airport for 5738 SEK per person (610 €) food on the aircraft excluded. The flight took 3 hours 15 minutes. We rented a new Ford Fiesta with air conditioning (but with a fairly weak engine) through Economy Car rentals (<https://www.economycarrentals.com/>) in advance. The rental included insurance and free mileage and the car was delivered at our hotel. The cost was 211 € (1980 SEK). On Madeira we participated in a guided tour to Pico de Areiro, an evening sea trip with Ventura do Mar off Funchal and we made a day trip to Porto Santo. The guided tour to Pico de Areiro costs 60 € per person (including a 20 € fee for entering the park) the evening trip with Ventura do Mar was 37 €, and the trip to Porto Santo 47 €. The weather was sunny to partly cloudy with temperatures around 27 °C in the afternoon and 20 °C in the nights. In all 46 bird species were seen.

## Itinerary

### Tuesday 2nd August

## **Pico do Areiro 22:30-24:00**

Catarina Fagundes and two more guides took us to the cliffs where the Zino's Petrels breed. It was a clear sky (it mostly is at this altitude) but the wind was very strong with the temperature below 15 °C. We sheltered behind some rocks and could clearly hear the tawny-owl-like cries from the petrels nearby. The first was heard 22.50. In total they were heard 8-10 times before we left at 24.00.

Zino's Petrel	Maybe 3 birds heard.

## Garajau 22:04-00:25

We were standing at the whale-watch just below the Christ statue. There is a narrow path leading down just to the right of the statue. Upon arriving to the area from the parking place up in the village, we already heard the peculiar sounds from Cory´s Shearwaters echoing when they in the darkness flew up to the mountains. They were most active between 22:04 and 23:05. The Madeiran Storm Petrels were heard for roughly one hour from 23:10.

Cory´s Shearwater	hundreds
Little Shearwater	A small shearwater was seen 3 to 4 times when it quickly passed by in the light from the statue. It was markedly smaller than the Cory´s with very dark upperparts.
Madeiran Storm Petrel	3-5 or more birds heard.
Barn Owl	1 heard and seen when it was hunting below the statue.
Small bat	1

Madeiran Storm Petrel	At least 3 heard more or less regularly. Due to the distance to the birds only the final squeaky ending was heard.
Barn Owl	1 seen below the statue 22:40.

## Monday 8<sup>th</sup> August

The day was solely spent on Porto Santo where we hired a car at the airport. The car was upon agreement returned at the ferry station in the evening. It is highly recommendable to do the island by car, because it must be quite hard to have enough time to walk or bike the whole island in one day. We hoped to see Red-legged Partridge and Pallid Swift, but neither could be found.

### Ferry Funchal-Porto Santo 8:00-10:30

Sea-watching from after-deck for the whole trip.

Cory´s Shearwater	2012, most birds off Ponta de São Lourenço.

Mandarin Duck	1 female
Plain Swift	10
Spanish Sparrow	10

### **Villa Baleira 18:30-20:00**

Perez's Frog	A few seen in the rivulet.
--------------	----------------------------

## Ferry Porto Santo – Funchal 20:00-22:30

Again sea-watching from after-deck for the whole trip. It could be wise to choose a more elevated stern deck on the right side with possibly better light in the evening. It was enough light to sea-watch until 21:15, when it got too dark.

Cory´s Shearwater	51. First seen 20:10. 10 seen in the light from the ferry close to Funchal.
Bulwer´s Petrel	17. First seen 20:25.
Small dolphin	10-12 seen 21:15 performing with several jumps from the sea. Two more seen briefly at 22 hours close to the ferry.

## Tuesday 9<sup>th</sup> August

No birding. Just transport to the airport.
